SUBJECT: Bioremediation Treatability Study  
Workplan Review

DATE: 12-22-92

FROM: Katherine Lose, RPM, (3HW42)  
DE/MD Section

TO: Don Draper, Director  
Groundwater Technical Support

In November, I forwarded portions of the Remedial Investigation Report for Standard Chlorine, a Superfund Site in New Castle, DE to you, to assist your staff in the review of a Workplan for the Bioremediation Treatability Study.

I would appreciate it if your staff could review the enclosed "Workplan for the Bioremediation Treatability Study for the Standard Chlorine Site". Whatever you can do to expedite the turn-around time for the review would be greatly appreciated because this site is scheduled for a Record of Decision by September of 1993.

I've also enclosed a memo dated November 12, 1992, which initiated my request for your services and delineated the type of review required for this document. If you have any questions, I can be reached at (215) 597-0910 and my facsimile number is (215) 597-9890. Thank you for your assistance in this project.
